## WE KNOW THE QUADRUPLE AIM

**Facktor's Clinical Quality Innovations (CQI) division builds upon the Quadruple Aim model of care delivery of producing better patient health outcomes, improving the clinical experience for providers, and fostering improved population health across communities while reducing the nation's high healthcare costs. We position clients to thrive in value-based care environments by implementing innovative and tailored improvement strategies that help providers reach their quality performance goals and advance clinical and operational efforts. Facktor's CQI division supports with:**

- Quality Improvement
- Patient-Centered Medical Home (PCMH)
- Value-based Care Readiness
- Practice Transformation
- Population Health Management
- HEDIS/UDS Performance Improvement
- Pay-for-Performance (P4P) Optimization
- OSV Preparation
- Whole-Person Care
- Clinical Best Practice Implementation
- Workflow Redesign
- Lean & PDSA Models for Change
- Federal Tort Claims Act (FTCA)
- Interim QI Director/Manager Staffing
- QI Coaching & Training
